Description

CryptoBox is a mystery box containing a random reward multiplier from a range between **x0.3** and **x400**. People all across the crypto universe will be able to purchase boxes with our own coin **CBOX** which is built on the Binance Smart Chain Network and is an essential element of this “**CryptoBox**” project.

The C-Boxers will receive their fruitful and valuable rewards in one of the six coins as followed: **Bitcoin**, **Etherium**, **Litecoin**, **Dogecoin**, **Shiba** and of course our coin **CBOX**.

As mentioned above **CBOX** is built on the Binance Smart Chain as its main chain because it's cheaper, faster and has an incredible scalability, so it converts in to BEP-20 coins to minimize the transactions fees.

Mission

We made a challenge to ourselves to push for greatness with everything we do and create the best community out there. The main mission of CBOX is to create an ever-expanding community thriving on a rewarding ecosystem, providing the holders with a chance to multiply their income.

We have also implemented a burn mechanism that will ensure that the price of CBOX will increase with every purchase of crypto boxes.

How it works

Our plan is to have different kinds of boxes with many diverse prices, each containing different multipliers. So for the start we gave our focus only on three boxes where for the cheapest box the maximum reward multiplier will be **x100** and it will scale up along with the cost of the box, up to a multiplier of **x400**. The purchasing of the **Crypto Boxes** will always be in our coin – **CBOX**.

Once the box is purchased the reward coin will be chosen randomly at the same time when the reward multiplier is chosen with a range from **x0.3** to **x400**, depending on the **CryptoBox**.

As mentioned above **CBOX** is built on the **Binance Smart Chain** as its main chain because it's cheaper, faster and has an incredible scalability, so it converts the reward in to BEP-20 coins to minimize the transactions fees.

Rewards

The total reward will be calculated with the following equation:

**(The cost of the crypto box calculated in BNB) *
(randomly chosen multiplier) = REWARD AMOUNT**

For things to be clearer for our **C-Boxers** we are giving you a simple example:

Let say the cheapest **CryptoBox** is 10.000 **CBOX** which by the current price of our coin is equal to 0.1 BNB. When the box is purchased let say the randomly chosen multiplier is x100. The total reward from this box is **10BNB**. After all this is done at the same time the reward gets randomly converted in one of the following coins: **Bitcoin, Ethereum, Litecoin, Dogecoin, Shiba** and **CBOX**.

Tokenomics

For each buy/sell transaction a certain fee will be taken and split accordingly.

Total Supply: 1,000,000,000

Token Symbol: CBOX

Token Decimals: 9

BSC Contract:

0xfd5ecb7b36313b606a6d6ba60858514f40e1751c

Buy Transaction (6 % fee)

- 2% Liquidity Pool
- 2% Rewards Pool
- 1.5% Marketing Wallet
- 0.5% Development Wallet

Sell Transaction (7 % fee)

- 2% Liquidity Pool
- 2% Rewards Pool
- 2% Marketing Wallet
- 1% Development Wallet

Tokenomics

When a c-Boxer will buy a crypto box the funds are split accordingly:

90% Rewards Pool

2% Burn Address

4% Marketing Wallet

4% Development Wallet

Team

Our founders team consists of:

- CEO
- CFO
- Marketing Manager
- Marketing Agent X2
- Graphic Designer
- Data Analyst

Roadmap

- **26th June 2022** - Launch at Pancake Swap and releasing of DAAP
- **July 2022** - CoinGecko Listing and CMC Listing
- **August 2022** - Grand Prize for holders that bought more than 5 boxes!
- **September 2022** - The reveal of the 4th
Crypto(NFT)Box
- **November 2022** - CryptoSwap

Audit
